Phone Number: 703-986-6386

Address: 9239 Hood Road,
Manassas, Va

About Me

I am an aspiring software developer/engineer. My first programming language was Java, which is when I learned about the "Uh-Huh" moments. The feeling of finally solving a complicated problem in a program. Since then I started learning more through school, forums, and videos. By designing websites (front end and back end), creating games, and integrating databases to learning new skills to add to projects I have worked on. I am currently on my way to possessing my B.S Degree in Information Technology from George Mason University in 2020.

Projects
